Ontrack EasyRecovery Professional offers a 30 day trial period which can be extended up to 120 days by simply purchasing a license. The full licensed version offers many more features than the free version such as file sanitization, file validation and data recovery. The product is designed for Windows XP, Windows Vista and Windows 7. Ontrack EasyRecovery Professional, unlike other disk recovery software, drops the recovered files directly to the location of your choice. This is a great feature as previously if you had to recover data from a failed hard drive then you would have to try and open the disk in an external SATA or IDE enclosure or buy a specific SATA or IDE enclosure with the appropriate connector and then you would need another computer that had a removable hard disk connector. This can be an expensive process and not always successful as if the connector you need is not available on your PC then there is no way to retrieve the data from your hard drive.
